SKILLS

Languages

PHP · JavaScript · TypeScript · SQL · C# · Java · C

Frameworks

Laravel · CakePHP · Vue.js · React · Next.js · React Native / Expo · Inertia.js · ASP.NET MVC

Front end

HTML · CSS · Tailwind CSS · Bootstrap · jQuery

Databases

MySQL · MariaDB · MS SQL · PostgreSQL · Supabase · Firebase

Tools & platforms

Git · Docker · Vite · Vitest · Cloudflare · Capacitor

Games & QA

Phaser · Three.js · Manual testing · Bug reporting

EDUCATION

BS Information Technology
Cebu Technological University
2020 – 2024

TVL – Computer System Servicing
Mandaue City Comprehensive National High School
2018 – 2020

LOUIE JAY A. CENIZA

Web Developer

PROFILE

Web developer at Forty Degrees Celsius, Inc. in Cebu IT Park, working on NativeCamp, one of Japan's largest online English conversation schools. I work across the stack in PHP (CakePHP, Laravel), Vue.js, React, TypeScript and MySQL, and my QA background keeps my work careful and well tested. Outside work I design and ship complete products on my own: a restaurant ordering platform, a realtime music chat app, and games for the web and Android.

EXPERIENCE

Web Developer
2024 – PRESENT

Forty Degrees Celsius, Inc. · Cebu IT Park · NativeCamp engineering team

- Develop and maintain features for NativeCamp's web platform on a CakePHP / PHP 8 codebase with Vue.js, React, jQuery, Tailwind CSS and MySQL.
- Migrate legacy pages to the new Laravel + Next.js (TypeScript) stack, keeping them visually identical to production on desktop and mobile.
- Work in a spec-driven release process: written specs, impact analysis, unit tests and review before deployment.

Web Developer / QA Intern
FEB 2024 – JUL 2024

Blenditoro Corp. · Philippine team of BlendIT (Estonia)

- Built **Drive**, a Google Drive–style file manager on a headless architecture (Laravel back end, Vue.js front end via Inertia.js): nested folders, uploads, sharing, trash and zip downloads.
- Explored new stacks to streamline production and found Laravel, Vue.js and Inertia.js a strong fit for the team's projects.
- Performed manual functional testing of web applications: checking new features, finding bugs and verifying UI/UX against specifications.
- Documented identified bugs and issues clearly to help developers fix them.

SELECTED PROJECTS

Isla Lola
Cozy Filipino farming game for web and Android: a full in-game year, 10 crops, 12 recipes, 5 languages.

`Phaser 4 · TypeScript · Capacitor · Vitest`

isla-lola.pages.dev

KusinaLink
Daily-menu ordering platform for a local restaurant: live stock, cutoff times, kitchen dashboard.

`Expo · React Native · TypeScript · Supabase`

kusinalink.expo.app

Jammr
Group chat where friends hear the same song at the same moment, on web and mobile.

`Cloudflare Workers · Durable Objects · WebSockets`

jammr.kan0.workers.dev

Adrift
First-person 3D ocean survival game in the browser with custom water and sky shaders.

`Three.js · JavaScript · Blender`

adrift-gamma.vercel.app
